PT-30 Day:\$195 - Wk:\$780 - Mo:\$1560

The PT-30 is ASV's most compact rubber track loader. It's sized to work in confined spaces, yet is productive enough to replace an entire crew of hand labor. The P-30 is also low-impact so it can work on finished lawns and landscaping without leaving damage. A wide range of performance-matched attachments make it ideal for many jobs.

PT-60 Day:\$250 - Wk:\$1000 - Mo:\$2000

The PT-60 is a quick and powerful rubber track loader. On firm dry ground it uses high engine torque, superior traction and fast speed to consistently outperform other similar sized machines. In wet or challenging conditions, the PT-60 uses exceptional flotation and low ground pressure to give superior performance - even where other equipment doesn't work at all.

PT-80 Day:\$280 - Wk:\$1120 - Mo:\$2240

The PT-80 is a world-class rubber track loader that digs hard and travels fast. Multi-level suspension maximizes traction and gives a smooth and stable ride. A two-speed drive system lets you choose between fast travel and high torque. Auxiliary hydraulics include powerful high flow and variable control low flow. The operator station is spacious and can be customized with many options.

PT-100 Day:\$300 - Wk:\$1200 - Mo:\$2400

The PT-100 is ASV's largest, most powerful rubber track loader. It features a suspended under-carriage with wide rubber tracks for productive operation, even in the worst ground conditions. A powerful high-flow auxiliary hydraulic system and a high capacity cooling system lets you tackle tough, demanding jobs all day long. The PT-100 includes a comfortable operator station, ergonomic joysticks and a load-sensing hydraulic system.

ST-50 Day:\$250 - Wk:\$700 - Mo:\$1500

The ASV ST-50 is a rubber tracked utility vehicle that offers exceptional versatility and mobility. It can travel over diverse terrain and the most difficult ground conditions. A large fuel capacity allows it to penetrate deeply into remote areas. The ST-50 is designed to be customized into a wide variety of configurations, making it the ideal platform for construction, landscaping, utilities and more.
