FEATURES

- Independent self-leveling depth adjustment plates allows for precise lapping cuts and taper cuts
- Planetary drive delivers high torque
- High rear spoil clearance to prevent recirculation of material
- Protective shields for hydraulic & electrical components
- Solid hardened steel wheels with greasable manifold pins and secluded greased zerks
- Exclusive angled spoil guard wheel design prevents wheels from riding up and over millings, this feature provides more force to the cutting action by significantly reducing rolling resistance and allow for maintained control over depth of cut
